

## SIRENS

### 9004 Series Sonic Remote Mount Siren Amplifier

The Sonic is flexible and easy to install, and packs a huge number of features into compact housing. Featuring both 60W and 100w outputs, the unit can provide a range of different volumes through a single speaker, so it's suitable for use at any time of the day or night, and in a full variety of locations. With run, horn and air horn inputs, Sonic units are adaptable and simple to operate, with users able to pick from up to 5 configurable tones via DIP switches.

Supplied with a two year warranty, and constructed to the highest standards from durable materials, Sonic also features a host of advanced circuit protection features which prevent damage from over/under voltages, overheating, surges and short circuits for added peace of mind.
